EIT ICT Labs Master's Programme

Distributed Systems and Services

Letter of Acceptance for Grigorev, Alexey, Date of birth 11/19/1989

On behalf of EIT ICT Labs KTH admissions office is pleased to inform you that you have been accepted as a degree student to the EIT ICT Labs Master's Programme with a technical major in Distributed Systems and Services **starting autumn 2013**.

You have been accepted to the programme with the following study track:

Entry university: University of Rennes 1 (Rennes, Paris)

Exit university and specialisation: Aalto University (Helsinki, Finland): Mobile Services

EIT ICT Labs has decided to award you :

- a fee waiver for the entire duration of the programme.
- a mobility and installation package of 3000 Euro.

The annual fee for this education is 3000 Euro.

Detailed conditions of the offer listed above are provided on the following page.

Prof. Carl Gustaf Jansson
EIT ICT Labs Master School Director

A cooperation between

Aalto University School of Science, Finland | Technische Universität Berlin, Germany | KTH Royal Institute of Technology, Sweden |
University of Rennes 1, France | Université Paris-Sud (UPS), France

1. You will receive an official Letter of Admission from your entry university with information about application for a student visa/residence permit, important dates, accommodation, enrollment etc. You are expected to arrive in time and commence the studies according to their instructions.
2. EIT ICT Labs students are covered by the EIT Insurance provided by the Swedish State (Kammarkollegiet). The insurance, including emergency medical and dental care, is valid in the 27 European Union countries, in EU-candidate countries and in the EEA/EFTA countries. The insurance applies without deductibles and the cover includes travel required for participation in the EIT ICT Labs Master's Programme. For terms and conditions we refer to the insurance certificate, sent separately.
3. The annual participation costs are € 8000 for non-EU member state citizens and € 3000 for EU member state citizens and citizens from Norway, Liechtenstein and Iceland. The tuition fee waiver is granted per semester, based on your study achievements. Further information regarding required study achievements will be included in your student agreement.
4. As a future student you are responsible for acquiring a student visa/residence permit for your first destination well in advance and also to collect documents required for future visa applications with respect to the available mobility tracks, such as health certificates, police certificates, copy of high school diploma etc. Contact the appropriate embassy in order to receive further information about the residence permit application procedure and start processing the residence permit immediately after receiving the Letter of Admission. Check if a transit visa is needed for intermediate landing when traveling to your entry point university.
5. The programme study period is equivalent to full time studies from autumn 2013 to summer 2015 and amounts to 120 ECTS credits. The minimum requirement for the degrees to be issued is successful completion of all required examinations at the degree issuing institutions, participation in all compulsory extra events, e.g. winter/summer school, as well as successful completion of the Master's thesis. At the end of the study period, degrees will be issued by both the entry and the exit point universities to students who have successfully passed all requirements for both universities. The degrees will be complemented with an EIT ICT Labs certificate documenting the EIT ICT Labs specific learning objectives.
